Nioh spear build stats guide osrs quest list

Nioh spear stats. Nioh stats build. Nioh spear build guide. Nioh spear build stats.

Your normal attack in Mid stance is the best crowd control you have with the weapon. You definitely won't want to use High stance with enemies that have high speed, or wield weapons like the Dual Swords. This stance can break enemies' guards and take off decent chunks of health, but it's also slow. Spears are the best weapons for range in Nioh, and that's something that'll definitely factor into your strategy if you're choosing a Spear build. I'm on NG+ (Way of the Strong).Level 130-ish.Spear as my main weapon and most points allotted to Body with 20 on the rest of the stats.There are so many armor sets that I am collecting now... Leveling up Strength is also effective since Spears are compatible with Medium Armors. I'm farming them with Ginchiyo from revenants.I need help/guide/tips for an easy, cheesy Spear build to finish the missions on Way of the Strong then on Way of the Demon.I'm willing to respect my skill points and prestige points to accommodate an ideal Spear build.What spear should I get?What armor set should I farm and equip?Where shall I invest my points for stats? Weapons that requires somewhat similar stats but scale differently are the Sword, Dual Swords, and Kusarigama. Recommended Passive Skills Name Effects Shadow Strike Damage dealt to enemies from behind increases when you have a spear equipped as your main weapon. Balanced Stats for Early Game The status increase between level 5 to level 10 is large compared to other levels for all stats. Recommended Stance is High and Mid As for normal attacks, use the fast high stance or high damage mid stance. Using Spearfall to knock enemies down from distance is an very effective strategy when using the spear. Nioh and Nioh 2 (including all DLCs) are also bundled in the Nioh Collection on PS5. all are of Divine quality. Your attacks can easily stagger enemies and still give you a window to dash out of harm's way, so use it to your advantage with enemies that have quick attacks. Therefore, it's better to balance out your stats rather than focusing on just one stat in the early game. First and foremost, the Mid stance is great when forced into a hallway, as you can use your strong attack to continuously thrust at enemies ahead of you. Let's take a look at all three. Level up Stamina to keep your Agility above B rank. I think this is also related to what armor set that I would use.As I mentioned in my other thread that I think Dragon Ninja is not for me.I'm on PS4 with Complete Edition of Nioh.Hope to receive your help again. Overview and Strategy Attack Enemies from distance The Spear allows players to attack enemies from distance with its long range. High - The High stance with the Spear is an incredibly powerful tool that can really dish out damage, but you'll need to be careful with it. Mid - The Mid stance is probably going to be your most used stance for the Spear as it provides great crowd control, and decent range. Because of this, the Low stance is best used when you need to pull back and regroup, regenerate Ki, or deal with large groups of ferocious enemies. February 16, 2021 Taku Bou Nioh 2 1 The best build and skills for Spear in Nioh 2 on PS5 and PS4. Relentless Maximum ki increases when you have a spear equipped as your main weapon. On top of all this, Mid stance dishes out some decent damage.
